(54) Title: WING MIRROR UNIT AND ACTUATOR

(57) Abstract: A wing mirror unit, in particular for a motor vehicle, comprising a detection system for detecting an object in a blind spot of the wing mirror unit, which detection system is provided with an observation unit for generating observation data, a data processing unit for processing the observation data, and an indication unit for displaying a warning signal, wherein internal data communication connections of the detection system are disposed in the wing mirror unit, so that the detection system is autonomous.
